He thought he had failed his goal, but a voice from the sky said that his gifts to others were considered gifts to God himself.

Percentage of People Using Social Media Sites

As you can see, there are many sites we can advertise on to reach our young customers. The chart from this year shows that Facebook is still the most popular, followed by Instagram in second, and Twidder in third. However, most people on Facebook are between 30 and 40 years old, while 90% of Instagram users are below 30. Twidder, which was the second most popular site last year, has also been losing young users.

Thank you for your report. I think that with our new project, we should avoid advertising on Facebook for two reasons. First, we are looking for customers between 18–29 years old, and other social media platforms have the kinds of users we are looking for. Second, Facebook is the most expensive. I think we will spend too much money if we advertise there. Our company's goal is to reach the most customers at the lowest price.
